

Step 7: Gender Assessment and Gender-Responsive Action Planning

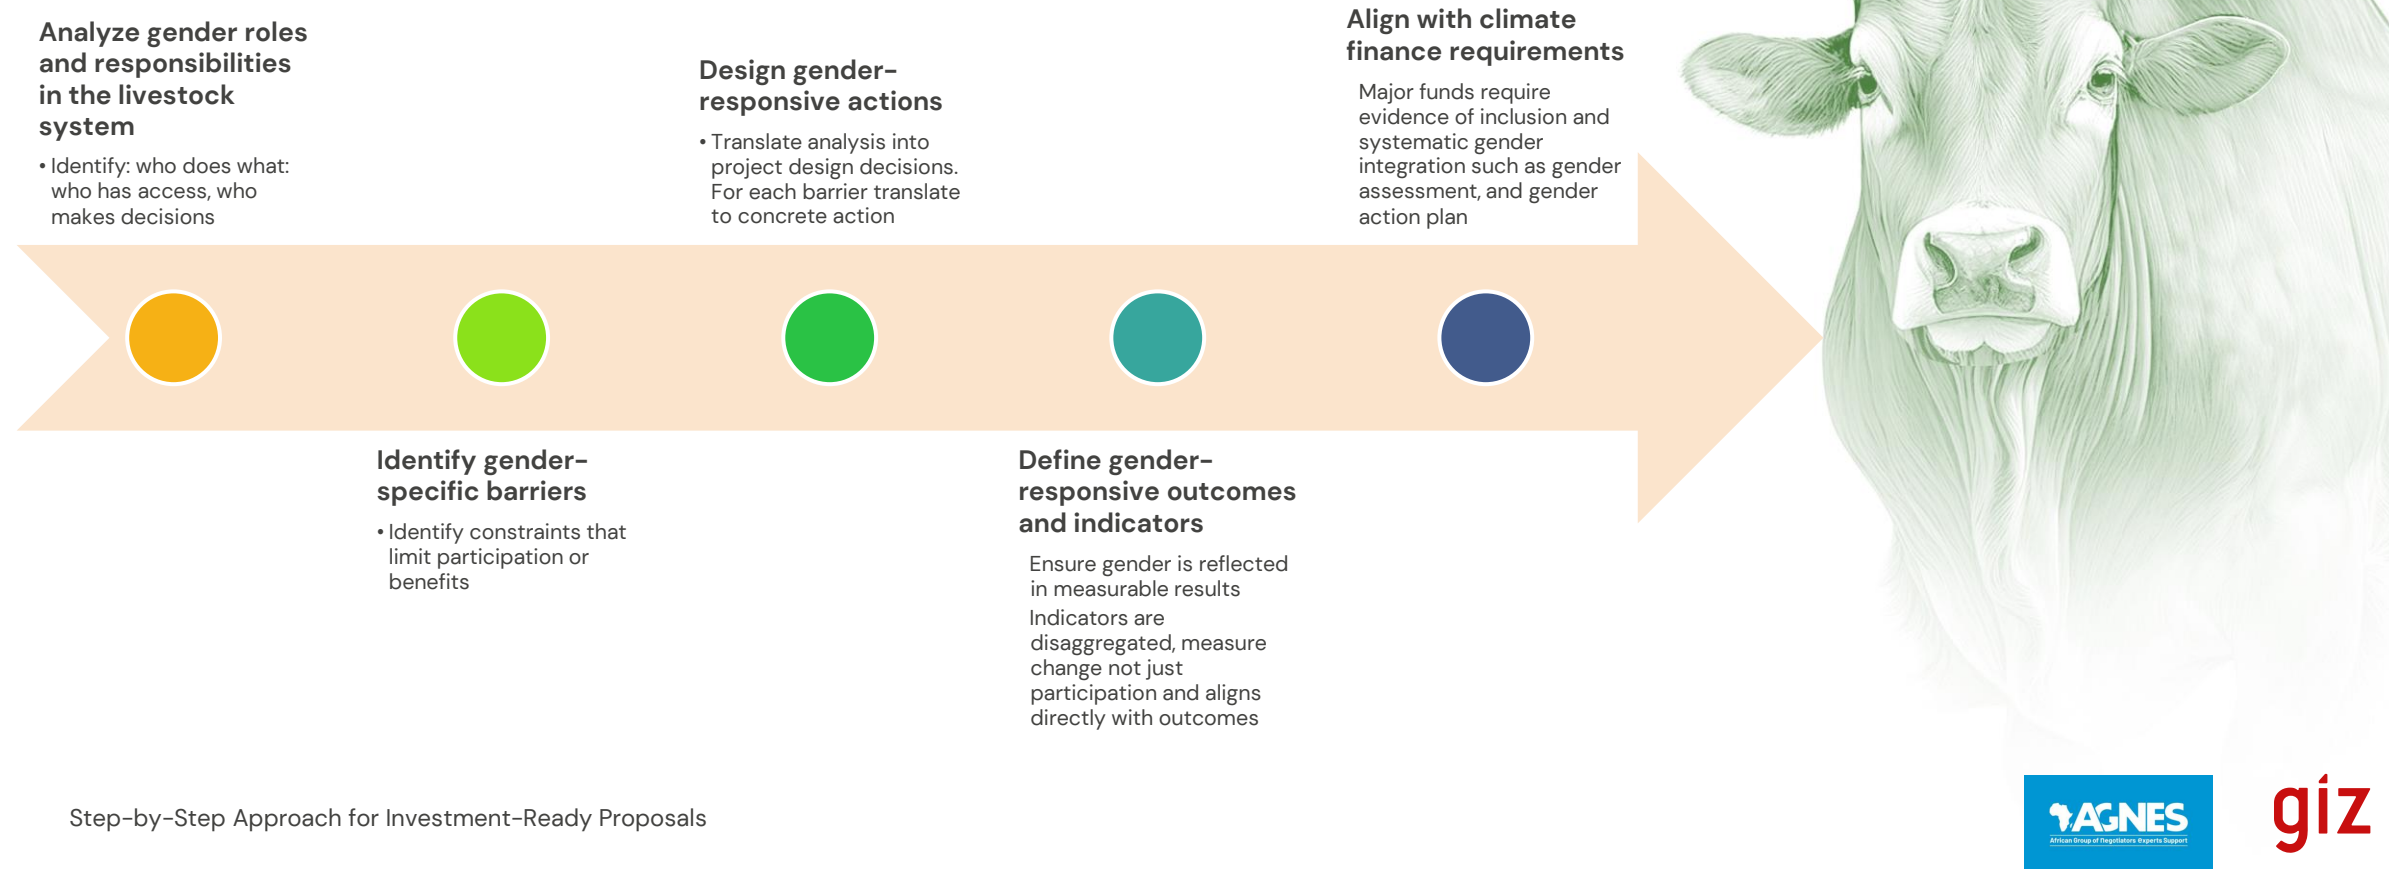

- Climate impacts and resource access are NOT experienced equally by women and men.
- There is difference in roles, decision-making, access to resources and climate risk exposure.
- Gender assessment is now a core requirement across major climate finance mechanism.
- Helps design interventions that are:
 - Inclusive
 - Effective
 - Bankable

Step 7: Gender Assessment and Gender-Responsive Action Planning

How to develop gender assessment and action planning

Step 7: Gender Assessment and Gender-Responsive Action Planning

Before moving to Step 8, check:

- ✓ Who does what in the system? (Roles, access, decision-making mapped)
- ✓ Are key barriers clearly identified? (Gender-specific constraints documented)
- ✓ Are actions specific and targeted? (Each barrier has corresponding action)
- ✓ Are gender results measurable? (Disaggregated indicators defined)
- ✓ Is gender integrated into the ToC? (Embedded across activities, outputs, outcomes)
